

List of Seminars sems. A 2020-2021 (Zoom)

Date	Lecturer	Title
19.10.2020	Tzion Fahima	Ancient Tandem Kinases: The Tale of Defense Decoys in Plant Immunity
26.10.202	Eran Tauber	Molecular Evolution of Circadian-clock Genes
02.11.202	Eyal Privman	Social Supergenes
09.11.202	Assaf Distelfeld	THE ORIGIN OF DOMESTICATED WHEAT: Insights from 'Forensic DNA' Studies and a New Wheat PanGenome Resource
16.11.202	Imad Shams	Go underground, stay tiny, safeguard the genome and live longer: secrets of the blind mole rat
23.11.202	Elah Pick	The Evolution of "Related Ubiquitin 1" and its Association with Mitochondria-derived Oxidative Stress
30.11.202	Nir Sapir	Bird migration ecology
07.12.202	Sarit Avrani	Micro- and macro-diversity are both important to bloom-forming cyanobacteria interactions with their phages
14.12.202	Irena Manov	Co-evolution of cellular senescence and inflammatory response in mammals and the unique strategy of the blind mole rat Spalax to suppress the inflammaging
21.12.202	Sagi Snir	Horizontal Gene Transfer Phylogenetics: A Random Walk Approach
28.12.202	Efraim Levinson	Medicinal Plants in the 'omic' era. Specialized metabolites biosynthesis in khat and mandrake
04.01.202	Ram Reshef	The Establishment of the Kidney Morphogenetic Field: New Head on Old Shoulders- cancelled
11.01.202	Malka Halpern	Chironomids and vibrio cholerae; friends or foes?
18.01.202	Avraham Korol	EVOLUTION OF RECOMBINATION FEATURES: MODELS AND EXPERIMENTS WITH DROSOPHILA
